PREPARING THE ROBOT

1 Make sure the on/off switch is set to 'on'. This is the switch on the side of the robot. Wait until the robot has started fully.

2 Place the robot in the docking station (charger) to charge.

3 Make sure the robot is fully charged, before using it for the first time.

Usually around 8 to 10 hours of charging would be enough. The robot only charges when the robot is turned on as shown in step 1

PREPARING THE ROBOT

4 Remove the robot from the docking station (charger).

It is not possible to register the robot in the app while it is physically in the docking station

5 Place the robot close to your router.
