

# APP CONNECTION GUIDE

**1**

Place the robot in the charging station (charger) to charge and make sure it's fully charged before use.

**2**

Remove the robot from the charging station (charger).

**3**

Make sure the Robot is on, by holding in the 'On button' for a few seconds on top of the robot. Wait until the robot has started fully.

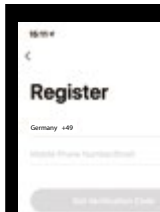

**4**

Download the app for your specific robot. (Bluebot app) The app can be found in the Appstore and Google play.

APPLE      ANDROID

**5**

Register a new account if you are not yet an existing user.

**6**

After your registration, make sure the robot is removed from its charging station. Turn on your Robot by pressing the 'On button'. After that is done, press both the 'Home button' and 'On button' simultaneously for more than 3 seconds until the robot mentions that it lost its wifi connection.

**7**

Open the Bluebot app and press the '+' icon to add your device.

**8**

Select the device you want to add.

**9**

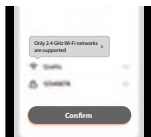

Select 'EZ mode' in the upper right if not yet selected and click 'confirm'.

**10**

Enter your wifi password and press confirm.

Only 2.4 GHz wi-fi networks are supported. Please see your router manual for help.

**11**

Press on the 'Go to connect' button in the bottom of your screen.

**12**

Select the 'SmartLife xxx' network from the list and return to the Bluebot app.

Your robot will now connect to the App.
